

A circular graphic with a torn paper effect, set against a background of SQL code. The text "Where quality delivery Matters" is prominently displayed in the center. "Where" and "quality delivery" are in a dark grey font, while "Matters" is in a large, bold, red font. The SQL code in the background includes terms like "bigint", "NULL", "utf8", "select", "schema", "EVENTS", "varchar", "information", "bug?", "KEYS", "varchar", "KEY_COLUMN_USAGE", "select", "unsigned", "YES", "bigint(21) unsigned", "information_schema", "PROFILING", "CONTEXT_VOLUNTARY", "PROFILING", "CONSTRAINT_SCHEMA", "utf8", "utf8_general_ci", "varchar", "longtext", "YES", "YES", "NULL", "YES", "varchar".

Where
quality delivery
Matters

Vision

Become a leading IT service company who is globally prestigious for first-class quality, technology innovation, customer satisfaction and trust.

Mission statement

Citigo is dedicated to:

- Be the link between clients and technology innovation;
- Provide solutions that match your requirements;
- Guarantee high quality, cost-efficiency;
- Benefit clients more than their expectations.

Introduction

Citigo (formerly known as ATT Software Ltd.) has achieved success on Information Technology in recent years. In early 2010, Citigo has been invested by one of the largest domestic banks.

With the hope for bringing out customers the utmost satisfaction, for the past few years, Citigo has been progressing and completing ourselves to meet the strict requirements of customers from the US, Australia, Japan, Singapore in terms of quality as well as progress.

With professional software application development skills on state-of-the-art technology platforms and profound understanding of customer's business as well as hands-on experience and a proven track record, combined with a proven software quality assurance system, we always fulfill clients' request to their utmost satisfaction of quality and progress. Being aware of the fact that client's success is our success as well, we continuously try our best not only to meet the imminent requests but also to serve long-term development demands.

Portfolio

ApplyDirect

Client: ApplyDirect Ltd., Australia

Technology: C# ASP .NET, MS SQL Server 2005, Web Services.

Description: A jobs search engine. At Apply Direct, the goal is to simplify the connection between the job seeker and the employer. Job Seekers can spend a lot of time on Job Boards searching through mountains of jobs, often poorly catalogued, and usually posted by Recruitment Agencies. Employers face challenges in filling their vacancies as Job Seekers may not be aware of their organisation and the jobs listed on their website

ARA Lay-By Direct

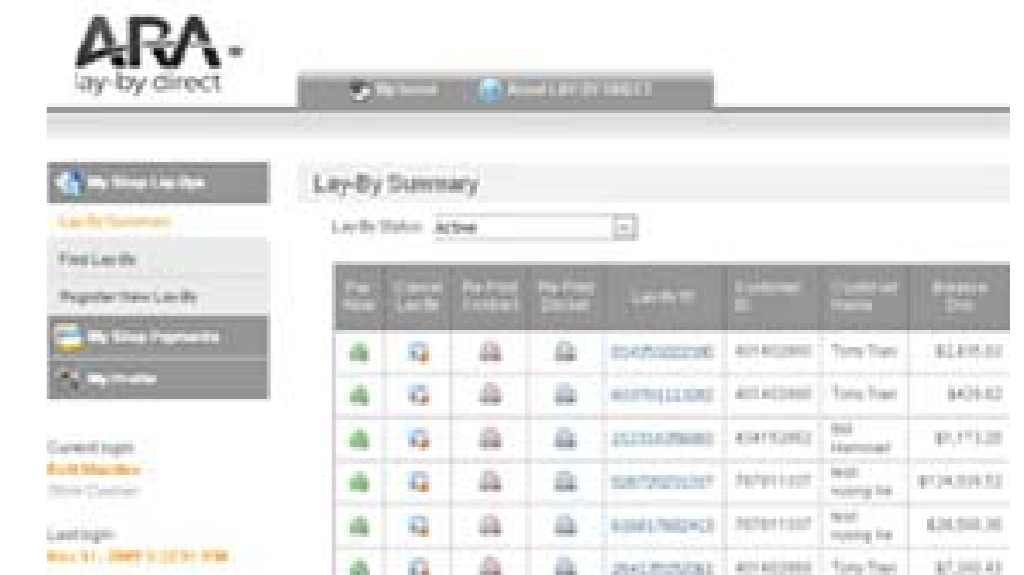

Client: Australia Retailers Assosiation

Technology: C# ASP .NET MVC, MS SQL Server 2005, DevExpress.

Description: Lay-By Direct is a system hosted on the internet that would allow retailers to create and manage customer lay-bys and for their customers to make repayments via the Internet instead of going to the store.
